REMARKS <u>This is UNEVALUATED</u>		

1. Between 0800 and 1500 on 14 July 1954, 32 MiG-15s and 3 Yak-11s were parked at Deutsch Wagram airfield. No flying was practiced. There was a 6/10 overcast at an altitude of about 1,500 meters, westerly wind of 15 km/h and good visibility. Only light activities were observed. Maintenance work was apparently being done on the MiG-15s.

2. The following observations were made at Deutsch Wagram military post: One truck, 3 large gray crates, 1 small crane, and 1 jeep were seen at the aircraft repair shop which was guarded by a sentry wearing black-bordered blue epaulets. Four tents had been erected in addition to the four tents which previously had been seen on the premises next to building No 28 on Bahnhof Strasse. Personnel wearing black-bordered blue epaulets were seen near the tents. One temporary building had been completed and another one was under construction almost opposite from building No 28 on Bahnhof Strasse. The construction workers were all civilians.

Thirty-two tents were observed in the yard alongside of the school. Twenty-three soldiers wearing black-bordered blue epaulets were engaged in athletics. Two trucks and 1 van-like truck were parked in the garage sheds. Twenty-one men wearing black-bordered blue epaulets and marching had marched from the eastern part of the town toward the school.

Sixteen trucks, 6 tank trucks, 4 signal trucks, and 1 truck with hoisting gear were parked in the sheds of the motor vehicle park which was guarded by a sentry wearing black-bordered blue epaulets.

bordered blue epaulets entered the town from the direction of Strasshof (4818 N/1638 E). A captain who wore blue-bordered blue epaulets and had a soiled uniform apparently inquired the way to the school. Later on the van-like truck was seen parked in front of the school.

3. The following observations were made at Straashof military post:

Two trucks and 1 field kitchen were parked in the yard of the "small building". Soldiers and female soldiers wearing black-bordered blue epaulets entered and left the installation. Four trucks and 2 van-like trucks were parked in the garage shed of the cantonment. Twenty-five soldiers wearing black-bordered blue epaulets were seen in the cantonment area. Sixteen trucks and 8 tank trucks were parked in the camp at the woods.

The solid fuel dump previously located at building No 26 on Lendler Gasse had apparently been moved to the backyard of the building opposite. Lendler Gasse No 26 was apparently used as quarters. Personnel wearing black-bordered blue epaulets were seen there.

4. Between 0900 and 1130 on 16 July, no activity was observed at building No 28 on Bahnhof Strasse at Deutschagram. The installation was not guarded. Three tents were seen in the yard of building No 19 on Bahnhof Strasse. No personnel or vehicular traffic was observed at building No 3 on Bahnhof Strasse. Twenty-five tents were seen in the yard of the building near the school. There was little activity by the personnel wearing black-bordered blue epaulets.

5. In the area between the Markgrafneusiedl-Obersiebenbrunn (4815 N/1643 E) - Gaenserndorf roads a new radio installation consisting of a signal truck with a 6-meter-high telescope mast and 4 vertical dipoles was seen in addition to the previously observed 8-meter-high antenna mast with cone-shaped bracing, the 6-meter-high antenna mast with cone-shaped bracing and the Adcock M station.
6. Between 1300 and 1400 on 16 July, an umbrella-shaped antenna on an 8-meter-high mast was observed in Parbasdorf (4816 N/1636 E). A van-like truck and 2 trucks were parked next to the antenna. A radar station consisting of a fishnet-type and a sniffer-type radar set was located about 200 meters east of Parbasdorf. Just east of this station was a Token-type radar set. In the town and between the town

and the radio installations, there was intensive traffic by personnel wearing black-bordered blue epaulettes. 3

1. Comment. Deutsch Wagram airfield is believed to be occupied by a fighter regiment. The superior division headquarters is possibly also stationed there.
2. Comment. An antenna presumably of the observed type and an Adcock DF station near it were also reported from Wiener Neustadt airfield. . It is possible that a VHF DF station is concerned.
3. Comment. This radar station was reported previously. The observation of air force soldiers near the installation tends to indicate that the station belongs to an air force unit and is possibly being operated by air force personnel. The station most likely belongs to the fighter division headquarters which is presumably stationed at Deutsch-Wagram.
